

## CS-T18 VOC-Free Fountain Solution

### DESCRIPTION OF THE PRODUCT

#### **Product Overview:**

CS-T18 VOC-Free [Fountain Solution](#) is mainly applied to various alcohol printing machines and planographic printing machines, and it is also applied to PS version or CTP version.

The dilution degree of CS-T18 Dampening Liquid free alcohol (GB5749 water) is 0.8%-2.0%.

#### **Product Characteristics:**

1. Dampening speed is fast, suitable for high speed printing machine for green printing.
2. Because of the thin water film, the ink's transfer and brightness are guaranteed.
3. With strong adaptability to various inks, it can speed up the dryness of ink and the shaping of presswork, and it also can prevent stickiness.
4. Dampening liquid contains water-reserving element, which can protect the printing plate at stop-press.
5. Contain bacteriostatic agent preventing bacteria breeding in water skip.
6. Contain special additive to protect the parts of the machine from erosion and reduce or remove the accumulation on rubber sheet.
7. Adjust the key parameter of water to more favorable scope and reduce the requirement of water by dampening liquid.
8. 100% VOC FREE, not easy to volatilize. At printing, the EC value is stable and reliable and the printing quality is stable. 100% alcohol or IPA free; safe and easy to use and convenient to store.
